

Faiha Co-op Local Development Setup

Project Overview

Faiha Co-operative E-Commerce application:

- Frontend: React 19 + Tailwind CSS (port 3000)
- Backend: FastAPI (port 8001)
- Database: MongoDB 7 (port 27017)

Step 1: Start MongoDB (Docker)

```
docker start faiha-mongo
```

Or if container doesn't exist:

```
docker run -d --name faiha-mongo -p 27017:27017 mongo:7
```

Step 2: Start Backend

```
cd D:\FaihaWebsite\Emergent\Chabir2406\backend
```

```
.venv\Scripts\python.exe -m uvicorn server:app --reload --port 8001
```

Step 3: Start Frontend

```
cd D:\FaihaWebsite\Emergent\Chabir2406\frontend
```

```
npm start
```

Access URLs

Frontend: <http://localhost:3000>

Backend API: <http://localhost:8001>

Login Credentials

Email: admin@faiha.coop

Password: Faiha@2026

Stopping Services

- Backend/Frontend: Press Ctrl+C in each terminal

- MongoDB: `docker stop faiha-mongo`

Troubleshooting

Port 3000 already in use:

```
Get-Process -Name node -ErrorAction SilentlyContinue | Stop-Process -Force
```

MongoDB connection error:

```
docker ps | findstr mongo
```

Faiha Co-op Local Development Setup

Project Structure

```
-----  
FaihaWebsite/Emergent/Chabir2406/  
  backend/  
    server.py      - FastAPI application  
    .env           - Environment variables  
    requirements.txt - Python dependencies  
    .venv/         - Virtual environment  
  frontend/  
    src/           - React source code  
    public/        - Static assets  
    package.json   - Node dependencies  
    craco.config.js - Webpack configuration  
    docker-compose.yml - Docker orchestration
```

Key API Endpoints

```
-----  
Public:  
GET  /api/settings      - App settings  
GET  /api/categories    - Product categories  
GET  /api/products      - Product list  
POST /api/checkout/place-order - Place order  
POST /api/auth/login    - Admin login
```

```
Admin (require auth):  
GET  /api/admin/dashboard/summary  
GET  /api/admin/orders  
GET  /api/admin/products  
GET  /api/admin/categories
```

Key Files Modified

```
-----  
backend/.env           - MongoDB URL, JWT secret  
frontend/public/index.html - Title, favicon, branding  
frontend/src/components/storefront/Footer.jsx - Contact info  
frontend/craco.config.js - Dev server config
```
